

Intelligent analytics to improve pipeline safety and compliance

Weaving together the expertise of Stantec, CartoPac and ReedSmith, Luminent provides solutions for tracking, preparing, and managing mandatory reports for oil and gas pipelines and other facilities.

The Pipeline and Hazardous Materials Safety Administration (PHMSA) requires annual reports by pipeline operators partitioned by state and for each commodity transported, including; hazardous liquids, natural gas (transmission, distribution, and storage,) and LNG. PHMSA also requires a report when there is a pipeline incident and submittal of geospatial pipeline data. Review of online data, some of which recently became accessible by the public, press, and non-Governmental organizations, reveals obvious and significant errors in data filed by many oil and gas companies. This presents a major risk to your corporate reputation.

Our desktop application pre-populates information, performs quality control checks and forwards draft reports for legal and technical review, while reducing labor, time, and costs. This can be upgraded to support geospatial data and submissions, further increasing the efficiency and utility of the regulatory filing.

Luminent helps you:

-  Improve regulatory compliance
-  Optimize capital allocation
-  Reduce costs
-  Greater confidence in regulatory filings
-  Know your greatest risk

Stantec is an international engineering and environmental services firm. We understand the link between business and the environment. We bring facilities, energy, technology, and infrastructure projects to life.

CartoPac provides enterprise solutions, services and support for the accurate collection of asset inventory and inspection data that are critical to integrity management and regulatory compliance programs.

Reed Smith represents many of the world's leading companies in complex litigation and other high-stakes disputes, cross-border and other strategic transactions, and crucial regulatory matters.
